A Short Guide

to the best varieties of Evergreens,
Shade Trees, Shrubs, Forestry
Seedlings, Transplants, etc., with
special quantity prices applying
for the Year of 1931

KELSEY NURSERY SERVICE
New York City

- 1. Kelsey Nursery Stock is grown where it grows best.** Always, of course, with due regard to shipping advantages. On twenty thousand acres of nursery land operated by the more than seventy growers, is grown a selection of hardy stock not to be matched by any one or more nurseries. Each grower is of recognized standing and competency. All stock furnished is the property of this Company, and we are amply responsible therefor.
- 2. We furnish our stock at the lowest prices made possible by mass production.** Prices of nursery stock vary greatly. One nursery grows stock on land worth, say, \$4,000 or \$5,000 per acre. The stock is no better than that grown at a nearly nursery where land is worth perhaps \$400.00 per acre. Nature has no partiality in this respect. We are, therefore, enabled to sell excellent stock at very low prices.
- 3. We are an entirely responsible source of supply.** Established Fifty Years ago, in 1878, we still have among our customers many who have been patrons for forty years or more. In all our dealings we are always willing to make things right on any errors or just causes for complaint.
- 4. Our Guarantee—Stock to be in good condition when furnished.** We will, however, replace any and all losses at half price.
- 5. Scarce and rare varieties:** Why look through a dozen nursery catalogues for them? Send us your list and we will quote promptly. This Short Guide is necessarily confined to standard varieties, but with our facilities we can furnish almost any variety or size grown in the United States.
- 6. The policy of this Company is to make and keep good will by careful and prompt service.**

PRICES—net, packing at cost. Five will be supplied at the 10 rate, 50 at the 100, and 250 at the 1000 rate.

Claims for errors or shortage to be made within ten days.

KEY TO NOTES

The information and cultural notes in this Guide have been carefully prepared and are trustworthy. The letters following the name of each variety throughout this Price List refer to the table published herewith. The figures following each name indicate ultimate height at maturity.

A—Profuse bloomer.
 B—Flowers very large.
 C—Good for cut flowers.
 D—Likes a light warm soil.
 E—Any good soil.
 F—Likes moist ground.

G—Slow growing.
 H—Rapid growing.
 I—Requires protection first year.
 J—Requires sheltered position.
 K—Very hardy.

Handling Small Evergreens

THE joy of watching baby trees grow up is a lasting one. In its earlier stages an evergreen requires some attention, but nothing which cannot be readily learned and practiced by an amateur. The following notes are designed to acquaint the beginner with the fundamental facts. For prices on small sizes refer to pages fifteen to eighteen. For more detailed information, see the back cover for technical books, or write us for advice.

Seedlings ["S"]

Many varieties of evergreens are raised from seed until they are two or three years old. These very small plants must be handled with extra care. They should be planted about four inches apart in beds. The beds can be four feet wide and as long as is necessary—up to 100 or 150 feet. Here they are left two years and for the first year, during the heat of the first Summer, should be shaded by a lath screen, rested on posts driven into the ground. They are hand cultivated frequently if satisfactory growth is to be obtained. In the Autumn, mulch with dead leaves three inches deep to prevent frost-heaving. At the end of two years, they should be taken from the beds and treated as transplants.

Transplants ["X"]

Evergreens that have been moved from one position to another, or that have had their roots pruned, tend to throw out extra roots near the stem, forming a close compact ball of fibrous roots that can be easily dug up when the tree is ready for its permanent location. This thick root system increases the chances for success enormously.

Transplants under six inches are so small that they can best be handled in the same way as seedlings, except in reforestation plantings. But over six inches in height the transplant is sufficiently sturdy to be planted out in the open field in rows four feet apart, and a foot or more apart in the rows, depending on the size of the transplants. Here the roots have room to grow, and the tops have room for shapely development. They should be cultivated to encourage a good growth, and being planted in rows, a power cultivator can be used.

Forestry

Transplants and even seedling of the hardier types **Spruce, Pine, Fir, etc.**—can be set out immediately in their permanent positions where a large acreage is to be forested or where a screen or mass effect is desired. A space one foot square should be cleared and the tree planted carefully and firmly. Such a planting requires no further care except for occasional clearing away of weeds. However, when first planted each tree must be thoroughly watered and for the next month should be further watered if rain is not normally plentiful.

Watering

Note well: an evergreen dies if its roots dry out. Whenever a shipment of evergreens is received, the roots should be examined and immediately soaked if they prove at all dry. They should then be planted at once if possible and well watered after planting and still once more two or three days later.

Heeling In

If it is impossible to plant evergreens immediately, they should be "heeled in." Dig a trench in a shady spot deep enough to hold the roots and open all bundles and spread the roots naturally in the trench. The earth is carefully thrown in over the roots and tramped down, water heavily. Evergreens may safely remain here two or three weeks until it is convenient to plant out.

Rooted Cuttings ["R.C."]

Many evergreens do not come true to type from seed. These are propagated by cuttings of branches rooted in sand. It is a difficult process, requiring months in a greenhouse under exact barometric conditions. In the case of the Yews, about two years is required. For this reason, cuttings are much more expensive than seedlings. They require the same care (for the first year) as seedlings, but once they have passed a Winter in the beds they can be treated as transplants, except for a few special varieties.

Grafts

Some trees which do not come true from seed will not even take root readily. These varieties are grafted on established roots of related species and when the graft is healed are perfectly hardy and can be treated as transplants. But during the first year, while the graft is healing, they must be carefully tended. Plant in beds and provide lath shading, removing on dull days so that the ground is not too wet. Mulch carefully in Winter and if possible place a wind protection around each bed. Once a Winter is safely passed out-of-doors, the danger is over. For this reason it is best to buy grafted varieties one year old. A few of these are listed on page 17.

How Many Trees in a Bed?

In a bed 4 feet wide and 10 feet long the following table indicates the number of trees. In a four-inches-apart planting and a bed 100 feet long, for instance, there would be 3,600 trees.

Distance	Number
4 x 4 inches.....	360 trees per bed
6 x 6 inches.....	160 trees per bed
8 x 8 inches.....	100 trees per bed

How Many Trees per Acre?

Rows 3 feet apart, trees 1 foot apart....	14,520
Rows 3 feet apart, trees 2 feet apart....	7,260
Rows 4 feet apart, trees 2 feet apart....	5,450
Rows 5 feet apart each way.....	1,745
Rows 6 feet apart each way.....	1,210

Some Amazing Prices

By special arrangement we offer the entire production of a large nursery in Maine specializing in Evergreen seedlings and small transplants for large Forestry plantings. This stock is exceptionally hardy on account of its Northern origin. The prices are offered with a view to enable large areas to be reforested with minimum expense.

Best Varieties for Special Soils

LIGHT SAND

Scotch Pine (Pinus)
Black Locust (Robinia)
Carolina Poplar (Populus)

SANDY LOAM

Red Pine (Pinus)
Black Locust (Robinia)
Carolina Poplar (Populus)
European Larch (Larix)
Arborvitae (Thuja Occidentalis)
Douglas Fir (Pseudotsuga)

GOOD SOIL

White Pine (Pinus)
Norway Spruce (Picea)
White Ash (Fraxinus)
European Larch (Larix)

COARSE GRAVEL

Red Pine (Pinus)
Black Locust (Robinia)

LOAM

White Pine (Pinus)
Norway Spruce (Picea)
White Ash (Fraxinus)
Carolina Poplar (Populus)
European Larch (Larix)
Arborvitae (Thuja)

WET LAND

Balsam Fir (Abies)
Arborvitae (Thuja Occidentalis)
Carolina Poplar (Populus)

The man who, forty years ago, was responsible for the planting of this grove of Pine is now dead. Posterity will long remember him for his far-sightedness. What more fitting monument to his memory?

Flowering Shrubs and Roses

THIS page, of course, could not begin to contain all the available varieties. The standard types of shrubs and roses will be gladly quoted on request. Many of them are beautiful and well worth planting. Small sizes are priced in the last page of this Short Guide. Only a few of the very choicest are here listed.

Trees and Shrubs Provide Bird Food

The following list of hardy fruit bearing shrubs for food for birds will be found convenient for ready reference. It embraces the best varieties that can now be furnished in quantity. The numbers following the bird names refer to the numbered plants as below. Prices are listed on pages 17 and 18.

Game Birds

Grouse: 2-5-6-7-8-11-12-16-20-21-22-26.
Partridge: 6-7-11-12-26.
Pheasant: 11-12-21-26.
Prairie Chicken: 8-20.
Quail: 2-5-6-7-11-12-15-17-19-22.
Snipe: 2-6-7-12-26.
Wild Geese: 13-24.
Woodcock: 6-7-26.

Song and Plumage Birds

Blackbird: 5-6-7-15-19-22.
Bluebird: 4-5-6-7-8-11-12-15-17-19-21-22-24-26-27.
Bobolink: 15-17-21-27.
Cardinal: 4-6-7-15-21-27.
Chickadee: 6-7-19-21.
Cuckoo: 15-21-27.
Finch: 6-7-21.
Flicker: 4-6-7-11-12-16-17-19-21-22-27.
Kingbird: 2-6-7-15-17-18-19-21-22-26-27.
Lark: 1-2-5-6-7-15-17-21-26-27.
Meadowlark: 1-26-27.
Mockingbird: 3-4-11-12-15-17-18-19-21-22-27.

Oriole: 15-17-22.

Starling: 6-7-13-15-16-17-19-21-22-26-27.
Swallow: 6-7-19.
Tanager: 15-17.
Thrush: 6-7-11-12-15-17-18-19-21-26.

Waxwing: 4-6-7-8-11-12-13-15-17-21-24-26.

Warbler: 13-19-21-26.
Woodpecker: 6-7-11-12-15-17-19-21-22-26-27.
Wren: 2-9-19-21-22.

Trees and Shrubs

1 Aronia arbutifolia.
2 Berberis Thunbergi.
3 Callicarpa (French Mulberry)
4 Celtis (Hackberry)
5 Cephalanthus (Button Bush)
6 Cornus Stolonifera
7 Cornus Florida
8 Eleagnus (Silverberry)
9 Euonymus Americana
10 Gaylussacia (Huckleberry)
11 Ilex Opaca (Holly)
12 Ilex Verticillata.
13 Juniperus Virginiana (Red Cedar)
14 Lonicera (Honeysuckle) (bush) (vine).

15 Morus (Mulberry).
16 Nyssa Multiflora.
17 Prunus (Choke Cherry).
18 Rhamnus Cathartica (Buckthorn).
19 Rhus (Sumac) (in variety).
20 Rosa (Rose) Lucida and Nitida.
21 Rubus (Raspberry)
22 Sambucus (Elderberry).
23 Sassafras Officinale.
24 Thuja American (Arbovitae).
25 Symphoricarpos Vulgaris (Snowberry).
26 Viburnum prunifolium.
27 Vitis (Wild Grape).

Roses

Again this year we are offering a selected list in two groups. Offer "A" consists of five of the very newest and best Roses. Offer "B" is a dozen Roses of proved worth and charm. Many of them were sensational discoveries a few years ago, but mass production now permits a low price. All plants listed are two-year-old field grown number one stock, up to the highest standards of modern rose growing.

Either offer

postpaid

\$7.00

Both offers

Seventeen Roses

\$13.00

Rose Offer "A" [5 roses]

Talisman—Another new rose of outstanding merit. A long bud averaging 25 to 28 petals. Outside petals are yellow to pink; inside from bright apricot to rose or deep pink, becoming brighter as the flower develops. Many awards, medals, etc., all over the country.

Dame Edith Helen—Many petaled blooms of clear pink.

Souv. de Georges Pernet—Introduced by the famous French hybridizer, Pernet Ducher. Blooms of shimmering rose with yellow at base of petals.

Mme. Edouard Herriot—Long pointed buds of coral red which changes as flower opens to a lovely orange pink.

Padre—Attractive and novel in coloring with long, coppery scarlet petals flushed with yellow at base. Growth strong and upright.

Special Offer "B"

A dozen well-known varieties of Hybrid Teas, all two-year-old, field grown, Number 1, postpaid for \$7.00.

Red Flowers

Red Radiance
Francis Scott Key
Etoile de France
Crusader

Pink Flowers

Briardiff
Willowmere
Mad. Butterfly
Lady Ashtown

Yellow Flowers

Mrs. Aaron Ward
Souv. de Claudius Pernet

White Flowers

Kaisarin A. Victoria
White Killarney

Some Unusual Shrubs

Azaleas

(See Also Pages 6 and 7)

Azalea Mollis (Lovely Azalea)

FGK—May. Ranges from light pink to rich yellow and red. (Each) (10)
12 to 15 inches, B. & B. \$2.50 \$24.00
15 to 18 inches, B. & B. 4.00 37.50

Azalea Arborescens

Large white bloom in July, fragrant.
18 to 24 inches, B. & B. \$1.60 \$14.00
2 to 3 feet, B. & B. 2.50 22.00

A. Calendulacea

Flame colored in June.
18 to 24 inches, B. & B. \$1.60 \$14.00
2 to 3 feet, B. & B. 2.50 22.00

A. Canescens (Rosea)

Similar to Vaseyi.
12 to 18 inches, B. & B. \$2.50 \$20.00

A. Nudiflora (Pinkster)

Deep pink in May.
18 to 24 inches, B. & B. \$1.60 \$14.00
2 to 3 feet, B. & B. 2.50 22.00

A. Vaseyi (Pinkshell)

Flowers profusely before the leaves appear, exquisite pink or rose.
18 to 24 inches, B. & B. \$1.60 \$14.00
2 to 3 feet, B. & B. 2.50 22.00

A. Viscosa (Swamp Azalea)

Early fragrant white.
18 to 24 inches, B. & B. \$1.60 \$14.00
2 to 3 feet, B. & B. 2.50 22.00

Special prices on 50 or more plants of one variety.

Kolkwitzia Amabilis (Beautybush)

New and very rare. Slim drooping branches. Abelia-like pink flowers in clusters along whole length of branches.

	(Each)	(10)	(100)
12 to 18 inches.	\$1.00	\$10.00	\$50.00
18 to 24 inches.	1.25	12.00	60.00
2 to 3 feet.	1.50	12.00	100.00

Philadelphus Virginal (Double Syringa)

Blooms nearly all Summer, white, fragrant, double flowers. New.

2 to 3 feet. \$.75 \$6.00 \$50.00

Mayflowered Viburnum (V. Carlesi)

Medium shrub with very fragrant clear pink blooms in May. Rare.

	\$1.50	\$12.50	\$110.00
12 to 18 inches.			
18 to 24 inches.	2.50	22.50	200.00
2 to 3 feet.	3.00	27.50	250.00

Spiraea Trichocarpa (Korean Spiraea)

A burst of white coming two weeks after S. Vanhouttei.

	\$1.00	\$ 8.50	\$70.00
2 to 3 feet.			
3 to 4 feet.	1.50	10.00	90.00

Redleaf Barberry (B. Thunbergi atropurea)

Leaves are purplish red all Summer, a unique note in the foliage scheme. New.

	\$1.75	\$15.00
12 to 15 inches.		
18 to 24 inches.	\$1.00	9.00 75.00

FLOWERING SHRUBS FOR HEDGES

Spiraea vanhouttei (Bridal Wreath)
Weigelia rosea
Deutzia crenata
Forsythia intermedia or fortunei

White Blossoms
Pink Blossoms
Pink Blossoms
Yellow Blossoms

	2 to 3 ft.	per 100
		\$10.00
	2 to 3 ft.	10.00
	2 to 3 ft.	10.00
	18 to 24 in.	10.00

The above are transplants, 3 to 5 branches. 25 of one variety at 100 rate.

Evergreens for Hedges and Screens

NOTHING but a brick wall can give the protection of a dense evergreen hedge—Winter and Summer. And brick walls have to be repaired. This page is devoted to a brief discussion of the various desirable kinds of evergreen hedges. We would suggest that we be permitted to make you a more definite recommendation for your particular case than can be given here. Conditions of climate and nature of soil, of course, enter largely into the choice of variety; but generally speaking all the kinds of evergreen hedges and screens described herein may be considered thoroughly hardy and can be successfully grown in any average good soil. Special prices will be found on page 15.

Japanese Cypress [Retinospora]

There are many varieties, several of which we list. The type is similar to the Arborvitae in foliage and shape, but the height ranges from five to fifteen feet, to make a fine formal hedge which can be easily sheared. Plant two to four feet apart.

This fine evergreen makes a thick even hedge remarkable for two things—it only requires three to four feet of width at the most for a tall hedge and it can also be sheared easily and responds in density. Very hardy.

We offer a very special bargain this year in trees 1½ to 2 feet high B. & B. Well grown, shapely stock, at \$80 per 100 (25 at the same rate). The following four varieties to choose from.

Plumosa	Pisifera
Plumosa aurea	Pisifera aurea

Japanese Yew [Taxus]

There is no finer hedge. It is absolutely hardy. Grows in shade or sun and stands shearing well. The upright variety—preferably grown from seed—is most recommended. We offer these 10 to 15 inches B. & B. at \$150 per 100.

Norway Red Pine [Pinus resinosa]

is another fast growing tree and particularly favored in that it seems to withstand all disease. It will grow in coarse gravel soils and can be safely planted in the most exposed places. The needles are dark green, thick and long.

SPRUCEs AND PINES AND FIRS as a general rule are for more natural effects—especially where a sturdy thick wall of living green is required to completely blot out undesirable views, or protection is required from prevailing winds. They are extremely hardy and thrive up to the verge of the Arctic Circle. They grow to a height of fifty feet or more and should be planted about five to six feet apart, if of good size, or as close as three feet if small trees are used.

The Pine hedge is best where very windy locations are to be screened off. It can be sheared and kept to a medium height. The Photograph at the right shows one twelve feet high.

Austrian Pine [Pinus austriaca]

is excellent for seashore planting and seems to thrive in this environment. It will do equally well, however, on any ordinary soil, preferring

A Hedge of Japanese Cypress (Retinospora) well established

A Hemlock Hedge is a sight never to be forgotten. Absolutely dense, it forms a soft-textured wall of living green. The Photograph above taken on Long Island of a hedge some ten feet high

Hemlock [Tsuga Canadensis]

An excellent hedge of dark green which can be kept in perfect form five to twenty feet in height. Hemlock thrives either in shade or in sunlight, but do not expose to severe wind. Plant the trees two to four feet apart, depending on the size used and height desired. Hemlock grows six inches to a foot per year, but is easily kept down by shearing, which adds to the density of the foliage.

Barberry is an inexpensive and satisfactory low hedge up to four feet. Plant one foot apart. Very hardy, it will thrive in shade and poor soil and its brilliant red berries make it attractive in Winter. 18 to 24 inches, \$15.00 per 100.

Norway Spruce (Picea excelsa) is dark green and the branches in older specimens have a pleasing droop. It grows on almost any soil. It will stand shearing, should a dense low hedge be required, at a height of six feet or more.

White Spruce (Picea alba) is light green and the branches point slightly upwards. In other respects quite similar to the above. It makes a very shapely tree.

Colorado Spruce (Picea pungens), a screen characteristically horizontal in effect. Color ranges from light green to silver and the variety is extremely hardy and stands severe winds.

Douglas Fir (Pseudotsuga taxifolia) represents the Fir type—softer in outline than the Spruces and perfectly hardy as to wind and cold exposures. It thrives best in good soil.

Scotch Pine (Pinus Sylvestris) is the fastest growing of all evergreens—up to two feet a year. It thrives in very poor soil and in sand and is excellent for quick screen effects, growing to a height of forty to sixty or seventy feet.

damp locations. It grows up to thirty or forty feet in height and is rather wide in spread. Planting five to ten feet apart for ultimate effect is recommended, instead of the usual three to six feet for this class of tree.

Evergreen Flowering Shrubs

SINCE 1878 when the business was established, this company has specialized in evergreen shrubs—such as Rhododendrons. On these two pages will be found a selection of the best, briefly described and priced. In the case of native varieties of Rhododendron and Mountain Laurel, we are in a position to furnish several grades of material, depending upon the intended use. The prices vary accordingly. True economy suggests an inquiry for quotation before ordering. We shall be glad to give any information or assistance and our prices will surprise you, quality considered.

Azalea

Azalea Hinodegiri (Japanese Evergreen)

Azalea

FJA—2 to 3 feet. Brilliant crimson bloom completely covers bush in May—foliage rich bronze in Winter. A superb variety. See next page.

Azalea Amoena (Lovely Azalea)

FJA—2 to 3 feet. Similar to above—mauve pink blooms.

8 to 10 inches.....	\$1.50	\$13.00	\$110.00
10 to 12 inches.....	2.00	18.00	170.00
12 to 15 inches.....	2.75	25.00	200.00

Azalea Kaempferi Hybrids

New variety of hardy evergreen Azalea, in various shades of pink and rose, brick red, mauve and lavender, beautiful effect in a group planting. FJA—2 to 3 feet. Bushy well budded plants. Priced and pictured on next page.

Abelia (A. Grandiflora) (Arbutus Bush)

AHK—5 feet. White bell shaped blooms in profusion over a period of about eleven weeks—June to September. Leaves rich bronze in Winter. North of New York this is not entirely evergreen, though perfectly hardy.

	(Each)	(10)	(100)
18 to 24 inches.....	\$.60	\$4.00	\$35.00
2 to 3 feet, Special.....	.75	6.00	50.00

Cotoneaster Horizontalis (Rock

Cotoneaster)

Small shiny leaves, bright red berries, low spreading habit. EGI—12 to 18 inches.

8 to 10 inch spread, from			
4 inch pots.....	\$10.00	\$80.00	
15 to 18 inches.....	14.00	90.00	

Boxwood

Buxus Suffruticosa (Box Edging)

Excellent border for garden paths, etc. EGIK—3 to 4 feet. Priced and described on next page.

Buxus Sempervirens (True Box)

Slow growing, stands shearing well, used in formal plantings. EGIK—10 to 15 feet.

A Small Specimen—Azalea Hinodegiri

Evergreen Vines and Ground Covers

Hall's Japan Honeysuckle

PLANT THESE UNDER RHODODENDRONS

They will add to the beauty of the planting by covering bare spots and help keep the soil in the necessary acid condition.

Oconee Bells (Shorea galeifolia)

Evergreen. White bell shaped flowers in early Spring.

	(100)	(1000)
Medium size transplants.....	\$16.00	\$150.00

Galax (Galax aphylla)

Beautiful heart shaped leaves turning scarlet when exposed to sun.

Strong clumps.....	\$12.00	\$80.00
--------------------	---------	---------

Euonymus Radicans (Wintercreeper)

Evergreen self-clinging vine, excellent for walk, under planting 15 to 20 feet.

	(10)	(100)
2 year bushy plants.....	\$4.00	\$30.00

Hedera Helix (English Ivy)

Evergreen, very hardy, excellent for shady and exposed positions where it thrives best. Small leaved varieties not as rapid a grower as large leaved. 25 to 50 feet.

Large leaved. Strong plants from 2 1/4 pots.....

	\$2.50	\$20.00
--	--------	---------

Lonicera Japonica Halliana (Hall's Japan Honeysuckle)

Semi-evergreen, very fragrant, quick growing and very hardy, 15 to 20 feet. Excellent cover for walls and fences.

2 year strong plants.....	\$4.00	\$25.00
1 year transplants (\$90.00 per thousand).....		10.00

Lonicera Sempervirens (Scarlet Trumpet)

Quick grower, scarlet flowers, July-September. 15 to 20 feet.

2 year strong plants.....	\$5.00	\$45.00
1 year transplants (\$80.00 per thousand).....		10.00

Japanese Spurge (Pachysandra terminalis)

Very hardy, low growing plant, will grow in shade where other plants die. Priced on next page.

Vinca Minor (Myrtle)

Trailing evergreen plant good in partial shade. Blue flowers in May.

Strong clumps.....	\$8.00	\$60.00
--------------------	--------	---------

Flowering Evergreen Aristocrats

R **RHODODENDRONS** for their beautiful foliage alone would be noteworthy evergreens. When added to this are the magnificent rose-like blossoms in a wide variety of color, no place can be complete without them. Since 1878 this company has specialized in Rhododendrons.

Hardy Hybrid Varieties

The listed varieties are the most satisfactory. All plants below are shapely and budded to bloom this spring.

Amphion—clear pink with white eye.
Catawbiense album—pure white.
Catawbiense grandiflorum—rosy lilac.
Mrs. C. S. Sargent—deep rose-red.
Roseum elegans—clear rose. A compact grower.
Everestianum—rosy lilac. Compact.
President Lincoln—lilac pink with brown eye.

	(Each)	(10)	(100)
1 to 1½ feet	\$ 5.00	\$ 47.50	\$ 400.00
1½ to 2 feet	7.50	70.00	600.00
2 to 2½ feet	12.00	110.00	975.00
2½ to 3 feet	15.00	135.00	1200.00

And for economy, smaller sizes 2-year old grafts about 12 inches high. Ten for \$25.00.

H **ARDY EVERGREEN AZALEAS** are unique and unusual. The two varieties listed here are the only ones we know thoroughly hardy in the North. Hinodigiri in Westchester County and the new Hybrids as far as Boston. Thoroughly evergreen—superb color—dainty form.

Azalea Hinodigiri

A dwarf bush thickly covered with gorgeous red flowers in May.

	(Each)	(10)	(100)
6 to 8 inches	\$1.75	\$15.00	\$130.00
8 to 10 inches	2.00	17.50	150.00
10 to 12 inches	2.50	22.00	190.00

New Hardy Hybrid Azaleas

A triumph of modern horticulture. The new "Kaempferi-Hybrids" are absolutely hardy and thoroughly evergreen. Shades of pink and red. We offer budded plants: mixed colors.

	(Each)	(10)	(100)
1 to 1½ feet	\$1.50	\$37.50	\$300.00
1½ to 2 feet	6.00	50.00	400.00

Native Varieties and Laurel

Most effective in masses. The foliage and bloom of natives still rival garden varieties.

Mountain Laurel

A glory of pink blossom in June, shiny leaf.

	(10)	(Carot)
18 to 24 inches	\$10.00	\$ 80.00
2 to 3 feet	15.00	120.00

Rhododendron Maximum

The Rose-bay. Large leaf and rosy-white flower in May.

	(10)	(100)
2 to 3 feet	\$16.00	\$ 80.00
3 to 4 feet	20.00	100.00

Rhododendron Catawbiense

A compact bush with rosy-purple blooms in June.

	(10)	(100)
2 to 3 feet	\$30.00	\$180.00
3 to 4 feet	45.00	350.00

These new hybrid Azaleas are available in named varieties and colors at \$5.00 to \$12.50 each, depending upon size.

Pachysandra: Living Carpet

A dense mat six inches high, the Pachysandra is indispensable where shade is too heavy to grow a good lawn. Plant close together for best results. It requires absolutely no attention.

	(100)	(1000)
2¼ inch pot plants	\$15.00	\$125.00
(25 or more at the rate per 100)		

Dwarf [Old English] Boxwood

A permanent investment. Aged specimens are priceless. Grows from one to two inches a year.

	(100)	(1000)
Edging		
6 to 8 inches	\$45.00	\$375.00
8 to 10 inches	65.00	550.00
Specimen	(Each)	(more)
12 to 15 inches	\$ 4.00	\$ 3.00
16 to 18 inches	12.00	9.50

The Daphne [Garland Flower]

One of the finest dwarf evergreen shrubs with clear pink blossoms in May and a profusion of bloom again in September. The flowers are very fragrant. The bush grows about one foot high and spreads to two feet in width.

	(Each)	(10)	(100)
6 to 8 inches	\$1.00	\$ 9.00	\$ 75.00
8 to 10 inches	1.25	12.00	95.00
10 to 12 inches	1.50	14.00	125.00
12 to 15 inches	2.00	20.00	190.00

Japanese Bloodleaf Maple

This dwarf tree makes a superb lawn specimen or in the shrub border its brilliant red makes a striking contrast. We offer only grafted trees.

	(10)	(100)
1 year old grafts	\$15.00	\$120.00
	(Each)	(10)
12 to 18 inches	\$2.50	\$22.50
18 to 24 inches	6.50	55.00
2 to 2½ feet	9.50	75.00

Japanese Bloodleaf Maple

Evergreen Trees

PAGES 8, 9 and 12 are listed alphabetically the various kinds of coniferous evergreens. Pages 10 and 11 are devoted to photographs in color and brief descriptions of certain selected varieties, for one reason or another, the most popular or valuable for various purposes. Again on pages 15, 16, 17 are listed the smaller sizes—seedlings and transplants. For cultural notes, refer to page 3 and for a discussion of Evergreen Hedges, page 5. All this represents a small portion of what is available. An inquiry will obtain prompt quotation on sizes or varieties not listed.

Arborvitae [Thuja]

American Arborvitae (T. Occidentalis)

EHK—15 to 20 feet. Narrow pyramidal tree. Dark green foliage. Excellent as a hedge and special prices on sizes for this purpose listed in back of the book.

	(Each)	(10)	(100)
18 to 24 inches.....	\$1.25	\$11.00	\$ 75.00
2 to 3 feet.....	1.50	14.00	90.00
3 to 4 feet.....	3.00	25.00	200.00
4 to 5 feet.....	4.00	37.50	350.00
5 to 6 feet.....	6.00	55.00	500.00

Globe Arborvitae (T. Globosa)

EHK—3 to 4 feet. Globe form. Bright green interesting foliage.

12 to 18 inches.....	\$1.50	\$12.50	\$100.00
18 to 24 inches.....	2.50	22.50	175.00

Siberian Arborvitae (T. Warreana)

EHK—10 to 15 feet. Splendidly dense, heavy blue green foliage.

18 to 24 inches.....	\$2.00	\$18.00
2 to 3 feet.....	3.00	27.00

Compact Arborvitae (T. Compacta)

EHK—4 to 6 feet. Heavy, dense, blue green foliage.

15 to 18 inches.....	\$1.50	\$12.50	\$100.00
18 to 24 inches.....	2.00	18.00	150.00

Pyramidal Arborvitae (T. Pyramidalis)

EHK—10 to 15 feet. Light green foliage. Does not grow ragged with age, but keeps its excellent dense form. Pictured and priced on page 11.

Unusual Evergreens

Write us for prices on rare and unusual evergreens not listed here. We have them in large and small sizes and will gladly answer inquiries.

Cryptomeria Lobbi

15 to 20 feet. Picturesque, narrow and compact column. Rich bronze in Winter.

	(10)	(100)
18 to 24 inches.....	\$25.00
2 to 3 feet.....	39.50
3 to 4 feet.....	58.00
4 to 5 feet.....	85.00

Cupressus Lawsoniana

Thick pyramidal tree, bright green foliage. A majestic specimen.

18 to 24 inches.....	\$20.00	\$150.00
2 to 2½ feet.....	25.00	195.00

Cedar of Lebanon (Cedrus Libani)

Large tree, with wide-spreading, horizontal branches. Round headed. Its beauty is historic, and the variety is of peculiar interest for its religious associations.

3 to 4 feet.....	\$40.00	\$350.00
------------------	---------	----------

Juniper

Blue Cedar (J. Virgin. Glauca)

EHK—15 to 20 feet. Silver gray foliage—vigorous.

	(Each)	(10)	(100)
18 to 24 inches.....	\$35.00	\$295.00
2 to 3 feet.....	45.00	395.00
3 to 4 feet.....	55.00	495.00

Prostrate Juniper (J. Communis Depressa)

EGK—3 to 4 feet. Gray green foliage and spreading to 10 feet or more. Useful to cover banks or rocks.

18 to 24 inches.....	\$2.00	\$18.00	\$125.00
2 to 3 feet.....	2.50	22.50	180.00

Common Golden Juniper (J. Canadensis Aurea)

EGK—3 to 4 feet. Dwarf, spreading, fine golden color.

15 to 18 inches.....	\$2.00	\$18.00	\$150.00
18 to 24 inches.....	3.00	25.00	195.00

Greek Juniper (J. Excelsa Stricta)

EGK—6 to 10 feet. A fine, dense, narrow column of pleasing color and texture.

12 to 15 inches.....	\$2.50	\$20.00	\$195.00
15 to 18 inches.....	3.00	25.00	225.00

Irish Juniper (J. Hibernica)

EHK—8 to 10 feet. A dense narrow column with light green foliage.

18 to 24 inches.....	\$1.00	\$ 9.00	\$ 80.00
2 to 3 feet.....	1.50	14.00	125.00

Red Cedar

(Juniperus Virginiana)

EHK—20 to 30 feet. A tall slender column of dark green, dense and bushy. Much used as an accent plant but also excellent in mass and field planting.

	(10)	(100)
2-3 feet \$27.50		
3-4 feet 35.00		
4-5 feet 50.00		
5-6 feet 60.00		
6-7 feet 75.00		

Pfitzer's Juniper (J. Pfitzeriana)

EGK—4 to 5 feet. Vase shaped spreading foliage, soft green. Thrives under city conditions. Priced on page 10.

Creeping Juniper (J. Sabina Tamariscifolia)

EHK—18 to 24 inches high—4 to 8 foot spread. Blush-green foliage.

	(Each)	(10)	(100)
12 to 15 inches.....	\$2.00	\$18.00	\$175.00
15 to 18 inches spread.....	2.50	24.00	225.00
18 to 24 inches.....	3.50	32.50

Swedish Juniper (J. Comm. Suecica)

EHK—7 to 8 feet. Like the Irish, but more bushy in growth.

18 to 24 inches.....	\$1.25	\$12.00	\$100.00
2 to 3 feet.....	2.00	18.00	160.00

Savin Juniper (J. Sabina)

EHK—4 to 5 feet. Irregular shape. Dark green foliage. Spreading branches.

18 to 24 inches.....	\$3.50	\$30.00	\$250.00
2 to 3 feet.....	3.75	35.00	295.00

The Fir [Abies]

While superficially similar to the Spruces, Firs are superior in every way. The foliage is longer and more interesting—the shape of the specimen is more graceful—and it retains its appearance to a ripe old age. Firs, except Balsam Fir, require a well drained soil.

Balsam Fir (A. Balsamea)

EHK—50 to 60 feet. Noted for the odor of the needles. A fine broad tree, regular and pyramidal.

	(10)	(100)
12 to 18 inches, B. & B.....	\$ 95.00
18 to 24 inches, B. & B.....	\$25.00	150.00
2 to 3 feet, B. & B.....	35.00	275.00

(Larger and smaller sizes on request.)

Silver Fir (A. Concolor)

EHK—40 to 50 feet. Dense pyramidal shape, foliage silver to steel blue. Makes a splendid specimen.

	(Each)	(10)	(100)
18 to 24 inches, B. & B.....	\$4.50	\$40.00	\$300.00
2 to 3 feet, B. & B.....	6.00	55.00	500.00
4 to 5 feet.....	110.00	1000.00
5 to 6 feet.....	140.00	1300.00
6 to 7 feet.....	170.00	1600.00

Veitch's Fir (A. Veitchi)

EHK—50 to 60 feet. Long dark green needles. Narrow pyramidal tree. Soft texture.

18 to 24 inches, B. & B.....	\$3.00	\$30.00
2 to 3 feet.....	4.50

Douglas Fir (Pseudotsuga)

EHK—40 to 50 feet. Compact dense foliage dark green. A superb variety excellent for mass planting. Pictured and priced on page 11.

Hemlock [Tsuga]

This is a glorious tree. It thrives in a range of soils and will succeed both in sun and shade. Do not, however, plant in windy, exposed situations. The foliage is black green and form graceful.

American Hemlock (T. Canadensis)

FHJ—60 to 70 feet. A superb tree that thrives in shade and with drooping spreading foliage. Makes a beautiful hedge and can be easily pruned. See page 10.

Evergreen Trees

The Pines

PROBABLY no tree is so typical of rugged strength. Far up on Mountain ranges a few trees battle the elements. The last tree of all, twisted and stunted, is more often than not a Pine tree. Pines will grow in any good soil. But they do best on gravelly or sandy soil, depending on variety.

White Pine (*Pinus strobus*)

EHK—60 to 100 feet. The finest native variety. Soft dense foliage and majestic spreading form. A variety to be planted in good soil. Unfortunately subject to a blister rust, and severely quarantined for this reason. Prices quoted on request, but small sizes listed in the green price list at the back.

Scotch Pine (*Pinus sylvestris*)

EHK—50 to 70 feet. Very hardy and fast growing. Thrives on poor soils.

	(Each)	(10)	(100)
18 to 24 inches.....			\$ 80.00
2 to 3 feet.....	\$1.50	\$13.50	100.00
3 to 4 feet.....	2.75	26.00	180.00
4 to 5 feet.....	4.00	37.50	350.00
5 to 6 feet.....	6.50	50.00	395.00

Japanese Red Pine (*P. densiflora*)

EHK—40 to 60 feet. Long bright green needles. An open headed tree, densely branched. Good for seashore planting.

18 to 24 inches.....	\$12.00	\$100.00	
2 to 3 feet.....	\$3.00	25.00	200.00
3 to 4 feet.....	4.50	40.00	320.00
4 to 5 feet.....	6.00	50.00	400.00
5 to 6 feet.....	7.50	60.00	495.00

Austrian Pine (*Pinus Austriaca*)

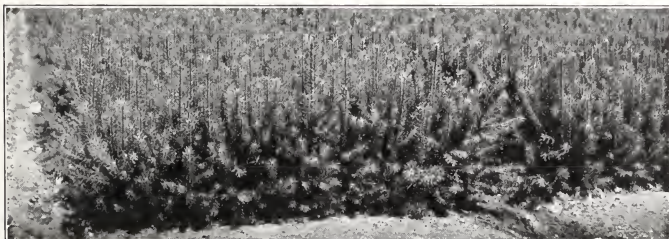

EHK—40 to 50 feet. The bushiest of the pines and fine for lawn specimen. Thrives near seashore. Priced on the next page.

Mugho Pine (*Pinus Mughus*)

EGK—6 to 8 feet. Dense, low, spreading growth, foliage bright green—two inch needles. Prices on next page.

Red Pine (*P. Resinosa*)

EHK—50 to 60 feet. Red bark, spreading branches. Very hardy and free from disease. Pictured and priced on the next page.

A bed of Riga Pine 18 to 24 inches X—bushy and clean

Riga Scotch Pine (*Pinus sylvestris* var. *Rigensis*)

This has long been known among foresters as a type altogether superior to ordinary Scots Pine. Where the type grows straggly and with a crooked leader, the Riga variety puts up a straight clean trunk. The color of branches is striking—noticeably reddish. The needles do

not turn so yellow in spring as those of the type. The Riga Pine also has a much longer life and makes a much greater height, up to 80 and 100 feet or more.

	(100)	(1000)
3 yr. S.....	\$1.00	\$ 6.00
3 to 5 inches X.....	2.00	12.00
6 to 12 inches X.....	3.00	16.00
12 to 18 inches X.....	9.00	70.00
18 to 24 inches X.....	12.00	90.00

The White Spruce (*Picea alba*)

This variety makes a shapely pyramidal tree and is one of the quickest growing spruces, being exceeded only slightly by the Norway Spruce. In New England generally it proves more satisfactory than this latter variety and forms a much denser and more perfect specimen.

In Forestry, the variety makes excellent pulp wood and has a ready sale for timber. It thrives in any good soil and is extremely hardy. At maturity this variety reaches a height of from forty to sixty feet and grows straight in form without attention.

The color of the needles is a light frosty green and is unique among large evergreens in this respect. Small trees are excellent as live Christmas Trees, and indeed this variety is commercially grown for the Christmas market. We offer the following grades:

Lining-out Size (see back of book).

Hedge Grade	(Each)	(10)	(100)
6 to 12 inches XX, bushy.....			\$10.00

Landscape Grade (B. & B.)

18 to 24 inches.....	\$1.00	\$ 9.00	\$5.00
2 to 3 feet.....	2.00	17.50	125.00
3 to 4 feet.....	3.00	27.50	200.00
4 to 5 feet.....	4.00	37.50	350.00
5 to 6 feet.....		70.00	650.00
6 to 7 feet.....		90.00	800.00

Unusual Spruces

Golden Spruce (*P. Excelsa aurea*)

EGK—Bright yellow branch tips give it a striking appearance. Medium height.

18 to 24 inches.....	\$4.50	\$35.00	\$295.00
----------------------	--------	---------	----------

Picea Inversa

EGK—A dwarf form of Weeping Norway Spruce with dense, close-set branches. The leaves are thick and lustrous.

18 to 24 inches.....	\$5.00	\$45.00	\$395.00
----------------------	--------	---------	----------

Pygmy Spruce

EGK—A very dwarf type of Norway Spruce. Ideal for rock garden.

10 to 12 inches.....	\$2.50	\$22.50
----------------------	--------	---------	-------

The Spruce is, at its best, hard to beat for specimen beauty

The Norway Spruce (*Picea Excelsa*)

Next to Red Pine the most popular evergreen for all purposes in the East. It is thoroughly hardy and subject to few insect pests, and these can be readily controlled. It is the most popular Christmas Tree, and its dark shiny needles make it desirable for this purpose. It grows into a spreading specimen from fifty to seventy feet in height with heavy pendulous branches. The variety thrives in any good soil and is excellent for planting as undergrowth in the shade of other trees. It is the fastest growing Spruce.

A real bargain in large transplants for mass or forestry planting this year. Over 200,000 Norway Spruce 9 to 16 inches once transplanted, packing included, at \$25.00 per thousand. We need their room and have priced them extraordinarily low.

Forestry Grade	(Each)	(10)	(100)
6 to 16 inches X.....			\$6.00

Landscape Grade (B. & B.)			
12 to 18 inches.....	\$.75	\$ 6.50	60.00
18 to 24 inches.....	1.00	9.00	80.00
2 to 3 feet.....	2.00	18.00	125.00
3 to 4 feet.....	4.00	30.00	250.00

The Blue Spruces

Colorado Spruce (*Picea pungens*)

40 to 65 feet—DGK. A shapely hardy native noted for the variation of color of its needles, which range from light green to silver blue. Colorado Blue Spruce is the blue form, selected.

Koster's Blue Spruce is the blue form, grafted. Priced and pictured on the next pages, in color.

Engelmann Spruce (*Picea engelmanni*)

DHK—60 to 70 feet. A splendid specimen tree, with needles denser than the usual Spruce and ranges in color from light blue to bright green. We offer a lining-out size, 9 to 12 inches once transplanted, elsewhere in the Guide at \$27.00 per 100. Here are also larger sizes, balled and burlapped.

	(10)	(100)
2 to 3 feet.....	\$50.00	\$450.00
3 to 4 feet.....	70.00	600.00
4 to 5 feet.....	90.00

Evergreens in Select Varieties

A Group of Red Pine 10 to 12 feet high

The Red [Norway] Pine

This superb native ranks as perhaps the most popular evergreen for all purposes. Its name is taken from the town of Norway, Maine. A tall vigorous grower and subject to practically no insect pests. It makes a fine specimen; a thick dense screen for mass planting; and is an excellent variety for reforestation. We offer sizes for all three purposes.

Forestry	(100)	(1000)
4 to 8 inch X	\$ 3.00	\$ 14.00
14 to 22 inches	16.00	125.00

Hedges	(100)	(1000)
18 to 24 inches	\$75.00	\$650.00

Specimen	(Each)	(10)	(100)
2 to 3 feet	\$2.50	\$20.00	\$130.00
3 to 4 feet	4.50	35.00	295.00
4 to 5 feet	7.50	65.00	375.00

And for quick screens we offer a special block in lots of 100 or more, 5 to 6 feet bushy trees at \$4.00 each. For carload shipment only. Massachusetts grown.

Upright Yew for Hedges

The Japanese Yew (*Taxus cuspidata*) is without question the hardiest race of Yews and the most satisfactory in the northern parts of this country. In its upright form, it makes a slow-growing dense tree. It likes shade. It makes an ideal evergreen hedge. We offer Upright Japanese Yew for hedges, 10 to 15 inches high, with balls of earth, in lots of 25 or more at \$150 per 100. And in larger sizes:

	(Each)	(10)	(100)
12 to 18 inches	\$3.00	\$25.00
18 to 24 inches	4.00	37.50	\$350.00
2 to 2½ feet	5.00	45.00

Bushy Little Trees You Can Grow into Specimens

IN a few years they will be valuable specimens. They need no more than ordinary garden care. We specialize in this size of nursery stock and have available a complete list of evergreens, evergreen shrubs, Deciduous trees and shrubs. Each "X" indicates a transplanting, which tends to produce bushy root systems and shapely tops. This stock is shipped packed in moss and without a ball of earth. Not less than fifty of each kind can be sold.

KELSEY NURSERY SERVICE

Fifty Church Street, New York City

American Hemlock

This superb native ranks high among evergreen aristocracy. The specimen pictured above is about six feet high. The variety thrives in shade and also is specially responsive to shearing, making a beautiful hedge.

	(Each)	(10)	(100)
1½ to 2 feet, B.&B.	\$2.00	\$18.00	\$175.00
2 to 2½ feet, B.&B.	3.00	28.00	275.00
2½ to 3 feet	4.50	42.50	300.00
3 to 3½ feet	6.00	55.00	350.00

Douglas Fir

Native to the West, this evergreen thrives in the East and North. A ten foot specimen is pictured above. A superb specimen tree but so hardy and satisfactory it is much used for forestry and mass plantings.

	(Each)	(10)	(100)
1½ to 2 feet, B. & B.	\$2.50	\$15.00	\$100.00
2 to 3 feet	4.00	25.00	200.00
3 to 4 feet	6.00	45.00	250.00
4 to 5 feet	7.50	59.00	460.00

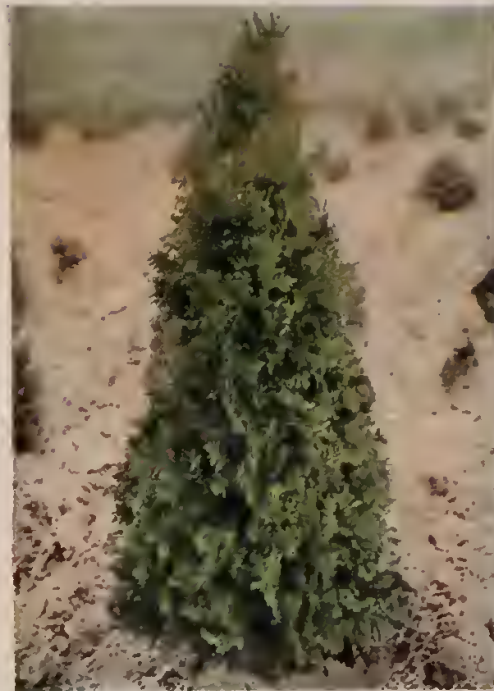

A Hedge of Cypress

Dense and green all winter—neat growing and easily sheared—Japanese Cypress (*Retinospora*) makes an ideal evergreen hedge. It is hardy and easily grown. We are offering a real bargain this spring in four varieties. All plants are transplanted and bushy furnished with ball of earth burlapped. No orders accepted for less than 25 of one kind.

Retinospora plumosa (green-plume).
Retinospora plumosa aurea (golden).
Retinospora pisifera (Pea-fruited).
Retinospora pisifera aurea (golden).

	(100)	(1000)
18 to 24 inches, B. & B.	\$80.00	\$750.00

This is a truly unusual opportunity. Compare these prices with others for the same quality.

Colorado Blue Spruce

The Blue Spruces

The Colorado Spruce (*Picea pungens*) produces both green and blue trees from its seed. The best of the blue trees are selected and sold as Colorado Blue Spruce. We offer:

	(Each)	(10)	(100)
12 to 18 inches, B.&B.	\$4.00	\$35.00	\$300.00
18 to 24 inches	5.00	45.00	400.00
2 to 2½ feet	7.50	70.00	600.00
3 to 3½ feet	10.00	85.00
3½ to 4 feet	12.50	110.00
4 to 4½ feet	15.00

Koster's Blue Spruce is a grafted form of the above. It is a better and more enduring color.

12 to 18 inches, B.&B.	\$7.50	\$45.00	\$400.00
18 to 24 inches	12.00	110.00	1000.00
2 to 2½ feet	15.00	135.00	1250.00

Englemann's Blue Spruce is a rare variety which we offer only in small sizes. It is steel blue and a tall grower. 9 to 12 inches X, \$27.00 per 100. (Sold in lots of 50 or more only.)

Norway Spruce

We can furnish this by the million. The last four pages of our catalog are devoted to small sizes of this and other varieties at bargain prices. Write for quotations.

Mugho Dwarf Pine

Pyramidal Arborvitae

This is perhaps the one best type of American Arborvitae or White Cedar. Its characteristics are clearly indicated in the above color-photograph. Very hardy. Ideal for formal narrow hedges, for which purpose we offer a special size: 10 to 12 inches XX, \$28.00 per 100. (\$260 per 1000). Larger sizes:

	(Each)	(10)	(100)
18 to 24 inches, B.&B.	\$1.75	\$16.50	\$150.00
2 to 3 feet	2.50	22.50	200.00
3 to 4 feet	3.50	32.50	300.00
4½ to 5 feet	7.50	70.00

The Mugho [Dwarf] Pine

This dense low-spreading evergreen is also subject to much variation, as its seed does not produce all true dwarf specimens. For this reason it is important to know with whom you deal. This year we offer an unusual bargain: 12 to 18 inches, B. & B., \$100 per 100. (Sold only in lots of 25 or more.)

	(Each)	(10)	(100)
15 to 18 in., specimen.	\$3.00	\$27.50	\$180.00
18 to 24 in., specimen.	4.00	35.00	250.00

A full-grown Pfitzer Juniper

The Austrian [Black] Pine

This is the neatest and most compact of the Pine trees. A shapely and majestic lawn specimen, but hardy and a good grower. Much used for seashore planting. Will grow in sand. We offer a special screen size, 10 to 18 inches, transplanted, at \$12 per 100. (\$75 per 1000.)

	(Each)	(10)	(100)
2 to 3 feet, B. & B. ...	\$4.00	\$30.00	\$225.00
3 to 4 feet, B. & B. ...	6.00	50.00	475.00

Pfitzer's Juniper

A full grown specimen pictured on the left. In spring the foliage is silver gray. The hardiest and most satisfactory of dwarf evergreens. We offer an economy size, 10 to 12 inches twice transplanted at \$45 per 100 and can ship 25 or more at this rate.

	(Each)	(10)	(100)
1 to 1½ feet, B. & B.	\$2.50	\$22.50
1½ to 2 feet, B. & B.	3.50	30.00
2 to 2½ feet, B. & B.	4.50	42.00

The Yew Tree (Taxus)

UNDOUBTEDLY the one most interesting evergreen at the present time. It has for centuries been famous in story and song in England, but the English Yew (*T. Baccata*) is not thoroughly hardy in the North. The Japanese Yew is, however, as well as the native American Yew. The Japanese Yew in its various forms promises to be the most valuable conifer in Northern gardens. All Yews withstand the most severe conditions and will succeed in dense shade as well as sun.

The above specimen of Improved Japanese Yew has been clipped back. The plants we offer have not been so treated, but this can be easily done with any of the Yews

Improved Japanese Yew

T. Cuspidata intermedia

This is a form between cuspidata and brevifolia (nana). It is a true dwarf, but not so very slow growing as the nana. Much preferable to the bush form of cuspidata for most purposes.

	(Each)	(10)	(100)
12 to 15 inches, B. & B.	\$2.50	\$24.00	\$225.00
15 to 18 inches	3.50	32.50	
18 to 24 inches	5.00	48.00	\$450.00

The photo above is a Japanese Yew of 2 feet spread

Spreading Japanese Yew

T. Cuspidata

EGK—A spreading bush to four or five feet, but much more than that across. Ideal for foundation plantings.

	(Each)	(10)	(100)
12 to 15 inches, B. & B.	\$2.50	\$24.00	\$225.00
15 to 18 inches	3.50	27.00	250.00
18 to 24 inches	4.00	37.50	360.00
2 to 2½ feet	6.00	54.00	

The picture above is a fine specimen of the upright Japanese Yew, 8 feet high. The form was obtained by clipping

Upright Japanese Yew

T. Cuspidata capitata

EK—A tree of medium height ultimately, but fairly slow in growth. Shiny black green needles. Superb as a lawn specimen or in hedges. (See page 5.)

	(Each)	(10)	(100)
12 to 18 inches, B. & B.	\$3.00	\$25.00	
18 to 24 inches	4.00	37.50	\$350.00
2 to 3 feet	5.00	45.00	

Japanese Cypress (Retinospora)

Plumed Japanese Cypress (Retinospora Plumosa)

EIK—15 feet. A tall pyramid with light green delicate foliage. Quite dense. The most popular variety.

	(10)	(100)
18-24 inches	\$16.00	\$ 80.00
2- 3 feet		
3- 4 feet	25.00	180.00
4- 5 feet	40.00	350.00
6- 8 feet	60.00	550.00

Golden Plumed Cypress (R. Plumosa aurea)

Same as the type in every way, except the foliage is bright golden yellow.

	(10)	(100)
18 to 24 inches	\$16.00	\$ 80.00
2 to 3 feet	25.00	195.00
3 to 4 feet	40.00	350.00

Veitch's Silver Cypress (R. Squarrosa Veitchii)

EGJ—10 to 15 feet. A very dense wide pyramid with beautiful silvery blue foliage, with a feathery soft texture.

	(10)	(100)
12 to 18 inches	\$12.00	\$100.00
18 to 24 inches	18.00	140.00
2 to 3 feet	35.00	285.00

Sawara Cypress (R. Pisifera)

EHK—15 feet. Pyramid shape. Foliage bluish green. Very hardy.

	(10)	(100)
18 to 24 inches	\$12.00	\$ 80.00
2 to 2½ feet	16.00	150.00
3 to 4 feet	30.00	
4 to 5 feet	40.00	
5 to 6 feet	60.00	

Golden Sawara Cypress (R. Pisifera aurea)

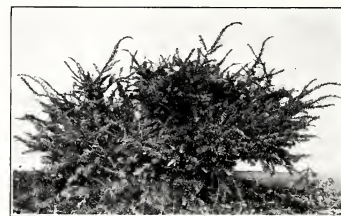

Same as above, but with gold tipped branches.

18 to 24 inches	\$16.00	\$ 80.00
2 to 3 feet	25.00	150.00
3 to 4 feet	40.00	300.00

Thread-Branched Cypress (R. Filifera)

EK—8 to 10 feet. String-like drooping foliage. Good green color. (Golden form of this variety quoted on request.)

	(10)	(100)
12 to 18 inches	\$15.00	\$ 80.00
18 to 24 inches	25.00	130.00
2 to 3 feet	35.00	250.00

American Yew

T. Canadensis

FGK—A dwarf spreading evergreen. Its branches are almost fernlike in spread, although the foliage is thick and needles prominent. A good border edging.

12 to 15 inches, B. & B.	\$1.50	\$12.00	\$100.00
----------------------------------	--------	---------	----------

Why Not Grow Your Own?

On the last four pages of this Guide will be found a list of available nursery stock in small, very inexpensive sizes. On page 3 will be found a brief description of growing methods. Why not raise specimens in your garden?

Deciduous Trees

UPON this and the following page will be found many varieties of ornamental trees priced and described. It is, however, merely a selection from our complete listings. We will be glad to quote other sizes or varieties on request. These trees are perhaps the easiest class of hardy planting material with which to succeed and give the quickest results. All stock is first class in every way.

Flowering Crabs [Malus]

These superb trees are effective for lawn specimens, but even more important when used plentifully in woodland and mass plantings, in the same way as Dogwood and Hawthorn.

There is a wide range of size and shape and color of bloom and the following list includes only a few of those we are in a position to furnish. The quantity prices are real bargains.

Atrosanguinea

Carmine Crab.	(Each)	(10)	(100)
3 to 4 feet.....	\$1.25	\$ 7.00	\$60.00
4 to 5 feet.....	2.00	9.00	80.00

Bechtel's Crab

Double, pink.			
3 to 4 feet.....	\$1.50	\$7.00	\$60.00
4 to 5 feet.....	2.00	10.00	90.00

Floribunda

Single, rose pink.			
3 to 4 feet.....	\$1.50	\$ 7.00	\$60.00
4 to 5 feet.....	2.00	10.00	90.00

Neidzwetziana, Redvein Crab

Entirely red—flowers, branches, leaves, and fruit.			
3 to 4 feet.....	\$1.25	\$10.00	\$ 90.00
7 to 8 feet.....	3.00	25.00	200.00

Parkman's Crab

Double rosy red flowers.			
3 to 4 feet.....	\$1.25	\$11.00	\$ 90.00
4 to 5 feet.....	2.00	15.00	125.00

Schiedeckeri

Early in bloom. Rosy pink.			
3 to 4 feet.....	\$1.25	\$11.00	\$100.00
4 to 5 feet.....	2.00	15.00	125.00

Flowering Plum

Purple-leaf Plum (Prunus pissardi)

EHK—8 to 10 feet. Striking purple foliage which does not fade in late Summer. Covered with pink flowers in May.

3 to 4 feet.....	\$1.00	\$ 7.00	\$40.00
5 to 6 feet.....	2.00	7.00	60.00

Double Flowering Plum (Prunus triloba)

EHK—5 to 6 feet. Large pink blooms in great profusion. May. Take care that the graft mark is set several inches below the ground.

2 to 3 feet.....	\$1.00	\$ 7.00	\$60.00
3 to 4 feet.....	1.25	10.00	80.00

Japanese Flowering Cherries

These are among the very first things to bloom in the Spring and extremely choice and scarce. We have several other varieties available in limited quantities. A small tree, entirely hardy. And notice these prices.

Named Varieties—as listed below.

3 to 4 feet.....	\$2.00	\$18.00	\$170.00
------------------	--------	---------	----------

Other sizes on request.

Fugenzo (J. H. Veitch)—Double pink. Late.

Naden (Sieboldi) (also called Kofugen)—Double pink.

Kwanzan (Sekizan)—Double old rose.

Shirofugen—Double white, pink shading.

Yoshino Cherry—Single pink. Fast growth.

25 of one variety at the 100 rate.

Japanese Weeping Cherry. Pink flowers. See page 14.

Siberian Weeping Cherry. A fine flowering tree with single white blossoms.
6 foot stems.....\$3.00 each

Pin Oak (Quercus palustris)

FHK—40 to 60 feet. A fine tree for street planting, particularly in moist soil. Shapely and stately in old age. The fastest growing Oak.

(Each)	(10)	(100)
6 to 8 feet.....	\$3.25	\$30.00
8 to 10 feet.....	4.50	40.00

(Larger quantities and sizes on request.)

Vase-shaped American Elm

Identical with the American Elm, but grown by budding from selected well shaped parents. A sensible precaution against your Elm trees turning out to be unsightly or unshapely, at maturity.

6 to 8 feet.....	\$2.00	\$17.50	\$150.00
8 to 10 feet.....	3.00	25.00	200.00
10 to 12 feet.....	4.00		

Redbud or Judas Tree (Cercis canadensis)

EGK—40 feet. A small tree notable for the profusion of bright red flowers which appear before the leaves in early Spring.

(Each)	
4 to 5 feet.....	\$1.25
5 to 6 feet.....	1.75

Ginkgo or Maidenhair Tree (Ginkgo biloba)

EHK—60 to 70 feet. A curious tree. Its nearest relatives died out during the last Ice age. This tree is unique. So far as history can follow it, it has been the sacred tree in Chinese temples. A hardy tolerant variety with good foliage and shape.

(Each)	
6 to 8 feet.....	\$3.50
8 to 10 feet.....	4.50

A road well planted with Oriental Plane

Oriental Plane

This fine tree is tolerant of smoke and other difficult conditions. It is neat and dense and the ideal shade tree for medium or narrow streets.

A Bargain Block of Oriental Plane

Growing in Maryland, now twice transplanted and shapely.

(Each)	
1½ to 1¾ inches caliper.....	\$175.00
1¾ to 1½ inches.....	150.00

There are about 2000 trees in the block for disposal this Spring. These are exceptional prices, but absolutely honest trees.

KELSEY NURSERY SERVICE for furnishing large and small shade trees for city streets, parks, etc., is well-known throughout the country. We have furnished plantings from Chicago to Norfolk, Va., from Florida to Maine, in each case under strict competition both as to price and quality. And we are ready to stand back of our shipments. We solicit lists for quotation.

The present market in shade trees in the desirable planting sizes is uncertain. From 1¼ to 2 inches in caliper we have at present a fair stock—as good as there is in the country. Some bargains in good varieties as well. But it is impossible to quote prices here that will remain on quantity shipments all season. A few of the better varieties are here described; but prices will be promptly quoted.

Ash (Fraxinus)

Green Ash (Fraxinus Viridissima)

EHK—40 to 50 feet. Open and spreading, almost entirely free from disease, does remarkably well in city conditions.

Catalpa

Catalpa Speciosa (Western Catalpa)

EHK—40 feet. Open growth and large leaves. A profusion of white blooms in July. A quick grower.

Elm (Ulmus)

American Elm (U. Americana)

EHK—60 to 80 feet. Easily the finest native tree, for street or park.

Linden

American Linden (T. Americana)

EHK—50 to 60 feet. Stately tree with large smooth leaves. Good for park or street.

European Linden (Vulgaris)

EGK—40 to 50 feet. Larger foliage than the preceding variety. Fine park tree.

Maple (Acer)

Norway Maple (A. Platanoides)

EGK—50 feet. Compact rounded top. One of the finest of street or avenue trees.

Sugar Maple (Acer Saccharinum)

EHK—40 to 60 feet. Upright dense growth. Leaves yellow and crimson in Autumn. Excellent for street or highway planting.

Silver Maple (A. Dasycarpum)

EHK—50 feet. Rapid grower and spreading. Popular avenue tree.

Oak (Quercus)

Red Oak (Q. Rubrum)

EHK—50 to 75 feet. A fine specimen. Hardy and vigorous.

Poplar (Populus)

Lombardy Poplar (P. Fastigiata)

EHK—40 to 50 feet. Narrow, compact and picturesque. Of extremely rapid growth.

Weeping Willow (S. Babylonica)

FHLJ—30 to 40 feet. Gray pendulous branches. Attractive near water.

Trees of Unusual Charm and Beauty

The Flowering Dogwood

What is spring without the white and pink Dogwood flowers? A glory of blossom, it is a familiar but never tiring spectacle.

White-flowering	(Each)	(10)	(100)
2 to 3 feet.....	\$1.00	\$ 9.00	\$80.00
3 to 4 feet.....	1.50	13.50	120.00
4 to 5 feet.....	2.00	17.50
5 to 6 feet.....	2.50	22.50

Pink-flowering (grafted)

18 to 24 inches.....	\$2.00	\$20.00	\$180.00
2 to 3 feet.....	3.50	32.50	275.00
3 to 4 feet.....	5.00	45.00	400.00
4 to 5 feet.....	7.50	65.00	500.00

Japanese Weeping Cherry

Among the unusual trees comes this exotic, with delicate pendant branches clothed with pink. We offer good heads on 6 foot stems at \$4.50 each. (\$40.00 for 10.) We can quote on many other varieties.

Cutleaf Weeping Birch

The Birches (Betula)

To many people the Birch is typical of New England woods. In clumps here and there on shady lawns, or in groves with ferns underfoot, it has a dryad attraction hard to resist. Single specimens are also effective.

Cutleaf Weeping Birch (*B. pendula laciniata*)

EHK—40 feet. Pictured above. Ideal for specimen.

	(Each)	(10)	(100)
4 to 5 feet.....	\$2.00	\$15.00	\$135.00
5 to 6 feet.....	3.00	22.50	150.00
6 to 8 feet.....	25.00	170.00

European White Birch (*B. alba*)

EHK—40 to 50 feet. Beautiful tree with spray-like branches. The white bark is effective among evergreens.

4 to 5 feet.....	\$1.00	\$ 9.00	\$ 75.00
5 to 6 feet.....	2.00	12.50	100.00
6 to 8 feet.....	2.50	20.00	150.00

Paper or Canoe Birch (*B. papyrifera*)

EHK—50 feet. Open in growth with silver-white bark. Should be planted in groups or massed.

4 to 6 feet.....	\$2.00	\$16.00	\$150.00
6 to 8 feet.....	2.50	22.50	195.00

The Purple Beech

Its smooth gray bark and unusual colored foliage make this a unique tree. Either as single specimens or in clumps, it is effective. Color-photo at the right. 18 to 24 inches, \$3.00 each. (\$25.00 per 10.)

Purple Beech Specimen

The Dogwood, Flowering Cherries, Crabs, Hawthorne and Mountain Ash are only at their best when seen in masses and if properly arranged such a mass planting can be a riot of color from earliest spring until July.

The Mountain Ash

Its showy red berries appear in early summer and remain until frost.

4 to 5 feet, \$1.00 each (\$8.00 per 10)
5 to 6 feet, \$1.50 each (\$12.00 per 10)
6 to 8 feet, \$2.00 each (\$100.00 per 100)

Paul's Scarlet Thorn

Paul's Scarlet Hawthorn

Illustrated above. Blooms in May. A fine specimen or subject for mass planting. We offer also white and pink flowered varieties. A Hawthorne in bloom is a sight never to be forgotten.

	(Each)	(10)	(100)
3 to 4 feet.....	\$1.50	\$12.50	\$100.00
4 to 5 feet.....	1.75	15.00	110.00

The New Chinese Elm (*Ulmus Pumila*)

From all over the country come extraordinary tales of this tree's rapid growth and phenomenal hardiness. So far as we can tell it really is the one ideal "Hurry-tree" for all parts of the country. It will not, however, make so rapid a growth in heavy or damp land, as it will on light, dry soil. It is important to cut back the side branches upon planting. New England grown from hardy North China seed.

	(Each)	(10)	(100)
5 to 6 feet.....	\$1.25	\$11.00	\$100.00
6 to 8 feet.....	1.75	15.00	135.00
8 to 10 feet.....	3.00	27.50

We also offer several thousand whips for growing on 3 to 4 feet high at \$15.00 per 100. Not less than 50 sold.

Kelsey Nursery Service

Established 1878

50 Church St., New York City

Telephone, COrtlandt 7-2660

The Return of the Forest

MARCHING millions year by year cover the bare and wasted hillsides. Bravely they march—Pines, Spruces, Firs, Larch and Hemlock. But for every new recruit in this army two are burned, killed by disease or cut down for timber and pulpwood. Yet, still they march—planted by men in all walks of life, but alike in one thing—Vision! And that vision is the Return of the Forest. Every acre unfit for other purposes should support a regiment of the Evergreen army—a thousand trees, straight and sturdy, loyal and cheerful.

It need not be costly. Commercial nurseries, such as this Company, will furnish small seedlings as low as five dollars per thousand. It need not take a lifetime to produce results: Larger transplanted trees may be purchased very reasonably as well; real bargains—as you can see—worth many of them twice the price here quoted. Should you be interested in any variety, it is an unusual opportunity. All are Eastern grown (mainly New England) raised from seed in nursery rows. Fine healthy stock in every way. The transplanting (“X”) indicates the quality.

The above Pine forest is, believe it or not, photographed on Long Island twenty years after planting. The stock used was around twelve inches and twice transplanted, similar to that offered on this page. The cost was negligible, considering the result so quickly obtained. We recommend these larger sizes as being enormous time-savers, while still economical.

Evergreen Seedlings and Transplants

"S" Indicates seedlings not transplanted.
"X" Indicates each transplanting.

ABIES Fir

Balsamea Balsam Fir

Its characteristic clean odor and stately appearance make this a desirable variety even without its well known value as timber. Ideal evergreen for wet land. Popular variety for Christmas trees.

8 to 10 inches XXX	30.00	250.00
10 to 12 inches XXX	40.00	380.00

NIGRA—

THE AUSTRIAN PINE

This variety of the Black Pine is perhaps the best of the hardy, fast growing kinds and succeeds in a wide variety of soil—even along benches subject to the salt spray of the sea. It is much used as a windbreak in estates near the ocean, but is equally adapted for forestry planting.

4 to 6 inches S.	(100)	(1000)
3 to 5 inches X	\$ 2.50	\$ 16.00
3 to 5 inches X	4.00	20.00

Ship into almost all States

6 to 10 inches X	12.00	95.00
------------------	-------	-------

sylvestris (Scotch Pine)

The variety par excellence for poor soils—even dry sand wastes can be successfully covered with Scotch Pine.

12 to 18 inches X	6.00	40.00
18 to 24 inches X	7.00	50.00

RIGA SCOTCH PINE

(Pinus sylvestris var. Rigensis)

This has long been known among foresters as a type altogether superior to ordinary Scots Pine. Where the tree grows straggly and with a crooked leader, the Riga variety puts up a straight clean trunk.

3 yr. S.	(100)	(1000)
3 to 5 inches X	\$ 1.00	\$ 6.00
6 to 12 inches X	2.00	12.00

From Our Customers

It is impossible to list even the names of the thousands of Park Departments, public institutions, private estates, and individuals that we serve. We print herewith a few from the many who have been kind enough to write us during the past year.

We furnished 325,000 small evergreens for reforesting the lands surrounding the reservoir at Wanaque, N. J., Chas. Welford Leavitt & Son, Landscape Architects, upon inspecting the planting two months later, wrote: "The inspection showed that the trees are growing unusually well and that no dead trees were found. This should be very gratifying to you, for it shows that the stock purchased was vigorous and healthy. . . ."

For the past three years we have been awarded in open competition the order for evergreens to be planted around the water reservoir systems near Reading, Pa. More than three quarters of a million small transplanted evergreens over the three planting seasons. Our customers have expressed themselves well pleased with stock and service.

Thanks for your letter. The evergreen seedlings purchased from you last year are making excellent progress.
Union County Park Commission,
Elizabeth, N. J.

We are glad to state that the nursery stock we received from you last Fall was very good quality and satisfactory in every way. Will remember your firm when in need of more.

Riverside Cemetery Association,
Rochester, N. Y.

The carload of Rhododendrons have all been very successful.

Mrs. M. C. Hill,
Oyster Bay, L. I.

We will not need any more trees this year. Last year's trees are progressing favorably.

H. I. Schmidt,
York, Pa.

The Roses and Daphne arrived in fine condition and look like good plants.

Mrs. Frederick Cate,
Salem, Mass.

It gives me great pleasure to say that the little evergreens are all doing finely and we are delighted with them. You may be sure we shall apply to you when we need more.

Mrs. C. M. Dunham,
Waltham, Mass.

My Rhododendrons purchased from you are the best of the very few grown in this vicinity.

W. M. Fay,
Proctor, Vt.

OUR SLOGAN

Good Stock — low prices — prompt service — unusually complete assortments, the products of many nurseries—and fair dealing.

Trial orders usually result in continued business hence they are appreciated by us.

KELSEY NURSERY SERVICE

50 CHURCH STREET
NEW YORK CITY

A List of Recommended Books

We consider the following books to best cover their respective subjects. Prices quoted include postage. We will gladly execute your orders direct, at publisher's prices:

STANDARDIZED PLANT NAMES

By American Joint Committee on Horticultural Nomenclature. An index of 45,000 plant names giving the scientific and common names approved by authorities. Does not give pronunciation or culture. 548 pages, 5¼ x 8, 1923. Cloth, \$6.00, postpaid.

AMERICAN PLANTS FOR AMERICAN GARDENS

By Roberts and Rehman. Association of plants and trees as Nature does it. 131 pages, 11 illustrations. Cloth, \$2.15.

THE BOOK OF SHRUBS

By Alfred C. Hottes. Gives comparison of species, characteristics, uses, soil, pruning, propagation, height in feet, exposure to plant, color of flowers, season of bloom, color of fruit, etc. Gives list of different shrubs for different purposes. 371 pages, 7 x 7½, 124 halftones, 56 sketches, 44 tables. 1928. Cloth, \$3.15.

GARDEN GUIDE

Each subject written by an authority. Edited by A. T. De La Mare. Exceptionally complete and reliable. Nearly 400 pages with over 275 illustrations. Paper, \$1.10, Cloth, \$1.65.

BIRDS OF THE WILD ("How to Make Your Home Their Home")

By Frank C. Pellett. Tells what plants to plant to attract wild birds as well as giving habits and descriptions of the wild birds. An original subject treated by a man of 20 years experience. 128 pages, 5 x 7½, 74 halftones. 1928. Cloth, \$1.85, postpaid.

FOUNDATION PLANTING

By Leonard H. Johnson. Shows how to beautify the immediate frontage of the house by means of plants. 236 pages, 7½ x 10 with 208 halftones and planting plans of mostly frontages with a few sides and rears. 1927. Cloth, \$3.65.

FIRST COUNTY PARK SYSTEM

By Fred'k W. Kelsey. A history of the development of the parks of Essex County, N. J. 300 pages, illustrated. Cloth, \$2.00.

EVERGREEN HEDGES

A small leaflet, Kelsey Nursery Service. Free.

HOW TO PLANT

Sixteen page booklet, Kelsey Nursery Service. Free.

CULTIVATED EVERGREENS

By L. H. Bailey. Recognized as the best handbook on the woody evergreens. 434 pages; 163 illustrations. \$3.15.

STANDARD CYCLOPEDIA OF HORTICULTURE

By L. H. Bailey. The one universal and invaluable authority. Makes a compact but thorough presentation of the kinds, characteristics and methods of cultivation of plants. 3,637 pages; 5,000 illustrations, three vol. \$25.00.

HORTUS

By L. H. Bailey. A cyclopedia in brief for those not possessing the above. A complete dictionary of American Horticulture. 652 pages. \$10.15.

THE NURSERY MANUAL

By L. H. Bailey. An extended list of plants with propagation methods. 453 pages; 240 illustrations. \$2.60.

THE PRUNING MANUAL

By L. H. Bailey. Instructions on just how and when to prune trees, shrubs, and vines. 400 pages; 381 illustrations. \$2.60.

MANUAL OF CULTIVATED TREES AND SHRUBS

By Alfred Rehder. The most complete reference available on trees and shrubs. The "Supreme Court" for decisions about plants. 967 pages. \$10.50.

CONSTRUCTIVE FORESTRY FOR THE PRIVATE OWNER

By J. J. Crumley. A guide to profitable management for the private timber owner. 340 pages; 80 illustrations. \$3.65.

MANUAL OF TREE AND SHRUB INSECTS

By E. P. Felt. Identification and control of insects attacking shade and forest trees, shrubs, and ornamentals. 398 pages; 256 illustrations. \$3.65.
